## HOW YOU LOOK AT THINGS

One day a professor entered the classroom and asked his students to prepare for a surprise test. They waited anxiously at their desks for the test to begin. The professor handed out the question paper with the text facing down as usual. Once he handed them all out, he asked his students to turn the page and begin.

To everyone's surprise, there were no questions, just a black dot in the center of the page.

The professor seeing the expression on everyone's face, told them the following, "I want you to write what you see there." The confused students got started on the inexplicable task. At the end of the class, the professor took all the answer papers and started reading each one of them aloud in front of all the students. All of them with no exceptions described the black dot, trying to explain its position in the middle of the sheet, etc.

After all had been read, the classroom was silent. The professor began to explain, "I am not going to grade you on this; I just wanted to give you something to think about. No one wrote about the white part of the paper. Everyone focused on the black dot and the same happens in our lives. We have a white paper to observe and enjoy, but we always focus on the dark spots. Our life is a gift given to us by God with love and care. We always have reasons to celebrate, nature renewing itself every day, our friends around us, the job that provides our livelihood, the miracles we see every day."

"However, we insist on focusing only on the dark spots, the health issues that bother us, the lack of money, the complicated relationship with a family member, the disappointment with a friend, etc. The dark spots are very small compared to everything we have in our lives, but they are the ones that pollute our minds. Take your eyes away from the black spots in your life. Enjoy each one of your blessings, each moment that life gives you. Be happy and live a life positively!"

**Moral:** As the professor explained, life is a bag of good and bad things; we all have positives and negatives along the way. But we must always concentrate more on the positives for a healthy and happy life. Life goes on no matter what; so, do not waste your time thinking about the negatives.

## GET READY NOW, IN CASE THE POWER GOES OUT!!!

With thunder storms and the hurricane season upon us, this is a reminder to be sure you have a working flashlight with fresh batteries should the power go out. Please make sure you have made the necessary arrangements for medications that need to stay refrigerated, any medical equipment you use like oxygen, nebulizers, C-pap or bi-pap machines, electric scooters, electric wheelchairs, or anything else you use that depends on electricity should the power go out for an extended period of time. You can work with your oxygen supplier regarding portable oxygen.

## REMINDER

If you have not already done so, please take a few minutes to complete the hurricane plan (disaster preparedness) form and return it to the service coordinator as soon as possible. You can either leave it at the front office or put it in the service coordinator's mail slot on her office door.

Management needs these forms to account for all residents should we have to evacuate.
